

profile natalie palmer

Natalie is a member of our Private Client Team. The team has a wide range of expertise and experience built up over many years which they use to help people of all backgrounds and situations plan for a better future.

Natalie, like other members of the department, can assist in relation to a broad range of issues affecting you and your family, providing you with advice on wills, trusts, inheritance tax planning and elderly Client issues. She can also help those who have suffered a bereavement and need sympathetic legal advice through a difficult time.

Whether you are single, a couple, a divorcee, a widow or widower (with or without children) it is essential that you plan to protect your and your family's future.

viewpoint

“ I particularly enjoy elderly Client work. People are living longer and longer and sadly, quality of life is not always guaranteed. Most of us these days know of someone who has experienced care issues in their later years.

Long term care can be very costly. For that reason, it is important to consider the funding consequences as early as possible. It is also important to have a will in place and to consider how best to protect assets. Once someone has been taken into care it is too late to put suitable arrangements in place.

Latimer Hinks can help people with a whole range of care related issues. We can review your situation and provide appropriate advice. Often we find that the elderly are not receiving the care and benefits for which they are eligible.

If you know someone who has not planned for the future, please encourage them to take advice now! ”
